FRESNO, CA – The Superior Court of California, County of Fresno, advises the public that its e-Court public portal remains temporarily unavailable for security reasons following an issue identified by its case management system vendor, Journal Technologies.

The outage affects public access to online case information but does not prevent the Court from continuing its regular case processing operations. Electronic filing remains available through participating Electronic Filing Service Providers (EFSPs), although some filing methods and services may be affected. Attorneys and litigants are encouraged to consult the Court's website or contact the appropriate court division for available filing options.

There is currently no estimated timeframe for restoration of the public portal. Public portals will be restored once necessary updates have been applied, tested, and verified.

The Court recognizes that these public portals provide important services to the court, justice agencies, and the communities we serve. While temporary interruptions are disruptive, we believe that maintain appropriate security controls before restoring public access is the responsible course of action.

For additional information and updates regarding the outage, please refer to Journal Technologies' public statement:
