NOTES FOR USE

This guide was compiled as a project of the Fresno Superior Court Program Oversight Committee.

The Committee at one of its earliest meetings determined that there was a lack of knowledge as to the many resources available in the community to assist those who appear in court on a regular basis. The committee believed that creating a comprehensive guide outlining the many resources available in the community was a good first step in addressing what additional resources were needed and how to facilitate availability to the community and court users. It was for these reasons that the Resource Guide was created as a tool for judicial officers and other court users.

The intent of the Superior Court Program Oversight Committee's Resource Guide is to provide information only. **There are no endorsements of any of the programs that are included in this Guide, nor have any of the programs been screened or in any other manner scrutinized to determine their abilities to deliver services to participants.** The hope is that this Guide can be a starting point for users to determine programs that are available in the community and to describe the services that they provide. This is only a beginning – our hope is that this Resource Guide will grow; **this Guide certainly does not include all resources available.**

The information provided in the Resource Guide is information provided to the Program Oversight Committee directly by the programs themselves unless otherwise noted.

It is the hope of the Program Oversight Committee that this Program Resource Guide will be updated yearly and will grow to include an even broader range of resources.

Hon. Jeff Bird
Chair, Program Oversight Committee

Program Providers

(ALPHABETICAL LISTING)
